Welcome and Acknowledgements

All OTESSA Participants can attend the Congress “Big Thinking” lecture series. These take place each day of the conference. Congress has “open events” available as well (open to registrants across association conferences at Congress as well as those who hold community passes). All OTESSA Registrants can also attend conference sessions offered by the Canadian Association for the Study of Education (CSSE), Canadian Association for the Study of Higher Education (CSSHE), and Canadian Association of Learned Journals (CALJ) as we have reciprocity agreements in place. Please note that presenters must register in each conference in which they are presenting. Join us at the #OTESSA23 Morning Radio Show every morning times TBA (Eastern) at <https://voiced.ca/>

Enabling ‘Students as Partners’: Open Textbooks, Power Shifts and Curriculum Transformation

Work done with open textbook creators at UCT has enabled the DOT4D initiative to articulate models of open textbook production that are being employed by academics at UCT who are using their open textbooks to address social (in)justice in the classroom. Building on this background work, we explore the values and attitudes of the academics who undertake open textbook production with student co-creators. Student inclusion is lauded in research as essential for student belonging, but little work has been done to look for the challenges involved when traditional power dynamics are disrupted. In this research, we describe a potential nexus of three complementary components: open textbooks, social justice, and students as partners. We investigate the affordances of the open textbook to facilitate change in the power dynamics of content production as well as in classroom practice.

Monday, May 29, 11:00 AM

Academic Integrity in the Age of Artificial Intelligence

How worried do we need to be that students are going to cheat more because of artificial intelligence? Does writing generated by an artificial intelligence (AI) writing app constitute plagiarism? How can artificial intelligence be used ethically for teaching, learning, and assessment? Will a robot take my job? These questions have dominated teaching and learning circles and social media since late 2022 when ChatGPT emerged. In this Keynote, Sarah provides insights into how AI tools are impacting higher education. She will share insights from recent research project at the University of Calgary that explores the question: What are the ethical implications of artificial intelligence technologies for teaching, learning, and assessment?

Nick Bertrand

//todo #2 *University of Calgary Wednesday, May 31, 11:00 AM**

Progressing truth, confronting complacency, and unleashing the possibility of healing through education.

Education as a tool for both healing and reconciliation has been an evolving movement over the years, and in particular since the release of the Truth and Reconciliation Commission 94 Calls to Action. Eight years later in a post TRC society, what truths remain untold? What lessons have we learned in trying to mobilize meaningful change? How can we as educators, uphold our responsibilities in the work of rebuilding the broken relationship that has brought us to this space? As the reconciliatory bridge continues to be constructed, education systems will continue to play a keystone role in the process of building awareness, understanding, and creating action.
